

HEALTH AND PHYSICAL EDUCATION

INFORMATION GUIDE

“A healthy outside starts from the inside.”

Robert Urich

Kilbreda College

A Kildare Education Ministries School in the Brigidine Tradition

The learning and teaching program at Kilbreda College is both dynamic and innovative, catering for the students' spiritual, academic, social, emotional and physical development. Students are challenged to be creative, critical and reflective thinkers and to develop a broad and transferable skill set. Opportunities for both independent and collaborative learning are provided and contemporary technologies are integrated throughout the learning and teaching program.

With schools playing an increasingly critical role in supporting students to make healthy lifestyle choices and to understand these choices on health and wellbeing, this Learning Area strives for participation from everyone. Therefore, the College offers an extensive and comprehensive Health and Physical Education program that is tailored to the needs of students at their various stages of development.

Health is a core subject from Year 7 to 10 and students have the option of choosing an elective at Year 10, before further pursuing VCE Health and Human Development. The theme of the Year 7 program is Changes, where students explore and discuss ways of dealing with social issues and emerging health issues in society. The physical challenges and changes that occur with puberty is also explored. At Year 8, the students explore the safe use of technology, healthy and safe relationships, as well as ways to reduce harm considering their increasing independence, the responsibility that comes with this and their values. In Year 9, nutrition, body image and a range of emerging health issues are explored and in Year 10 the emphasis is on responsible decision making.

Physical Education is also offered from Years 7 to 12. Students are involved in a range of physical activities, which include a bicycle education program at Year 7, a lifesaving program at Year 8 and a self-defence program at Year 9. Each year level focusses on a number of different sports throughout each semester. The focus in Year 10 is on recreational activities that encourage lifelong participation in physical activity and exercise. Students also have the opportunity to choose elective subjects at Year 9 and 10, if they are interested in pursuing Physical Education further in Years 11 and 12.

The Physical Education program is designed to ensure students are motivated to participate all year through. Sports include but are not limited to; Athletics, Aerobics, Australian Rules Football, Badminton, Basketball, Cricket, Dance, European Handball, Fitness, Hockey, Lacrosse, Netball, Soccer, Softball, Swimming, Tennis and Volleyball.

There are many excursions across these subjects including utilising our local beach, bike rides, fitness, trampolining and the Melbourne Cable Park

HEALTH AND PHYSICAL EDUCATION

Health and Physical Education Curriculum

The Health and Physical Education curriculum includes a range of core subjects and electives, both semester based and year long.

YEAR 7	YEAR 8	YEAR 9
